

GROUP 16 - COURSE PROJECT ABSTRACT

Event Management System For NITC

Introduction:

Our college has a plethora of technical and cultural events, informative webinars etc., going on week in week out. Sometimes, students miss out on interesting events due to lack of awareness on what's happening in the Campus. This project mainly consolidates all the events at one place, for the students to view and plan their schedules accordingly.

Objectives:

1. This project enables all the Department Associations like CSEA, Technical & Cultural Clubs, and Social Initiatives like NSS to post all their events on a unified platform for students to view.
2. The organizing teams of the respective events are the biggest benefactors, as the word of their event reaches out to the entire student community.
3. This also assists the organizing team to schedule the event accordingly, in order to avoid clashes between two events.
4. Students can easily view and register for the event of their choice.
